

VENKATESU

REACT JS DEVELOPER

West Godavari, AP-534111

vnkt6811@gmail.com

+91-7995425957

PROFILE INFO

Highly skilled and innovative React.js developer around 3 years of hands-on experience in designing and implementing dynamic, user-friendly web applications. Proficient in leveraging the power of React.js to create interactive, responsive, and performant user interfaces. Adept at collaborating with cross-functional teams and clients to deliver exceptional web solutions.

EXPERIENCE

- Nov 2024 - January 2025
Infovision Labs (Hyderabad,India)
REACT JS DEVELOPER
 - Developed and maintained web applications using React and JavaScript, focusing on creating optimal user experiences. Managed state efficiently with Redux and related tools, ensuring smooth data handling and enhancing performance.
 - Implemented responsive designs to ensure seamless user experiences across devices. Focused on performance optimization, ensuring web applications are robust, efficient, and user-friendly.
 - Integrated third-party APIs to extend functionality and improve user interactions, contributing to more dynamic and engaging web applications.
 - Worked closely with designers, backend developers, and product managers to deliver cohesive, high-quality web applications. Utilized Agile methodologies like Scrum and Kanban to ensure timely project delivery and adapt to changing requirements.
 - Participated in regular code reviews to maintain high code quality, adhere to best practices, and mentor junior developers. Troubleshoot and resolved issues to ensure robust application performance.

EDUCATION

B-Tech(EEE)

**WISE(west godavari
institute of science and engg)**

JNTUK University- 2019

SKILLS

- React
- Redux
- Node JS
- Express
- MongoDB
- Javascript
- Styled component
- Material UI
- Bootstrap
- Sass
- Html
- CSS
- TypeScript

EXPERIENCE

Apr 2022 - Aug 2024

STRAIVE , chennai

Front End Developer

- Assisted in developing web applications by writing and maintaining components in React and Vue under the guidance of senior developers.
 - Supported the implementation of essential state management solutions using Redux to streamline data flow.
 - Contributed to creating responsive web pages, ensuring they functioned well on various devices.
 - Performed initial bug fixing and troubleshooting, escalating complex issues to senior developers as needed.
 - Participated in team meetings and code reviews to learn best practices and improve coding skills.
 - Helped integrate APIs and third-party services to enhance application functionality and used HOOKs.
 - Collaborated with team members to understand project requirements and deliver tasks on time.
 - Engaged in continuous learning and development by keeping up with the latest web development trends and technologies.
-
- They focus on crafting efficient and scalable front-end code, often working with other technologies like JavaScript,HTML, and CSS, and potentially backend technologies like Node.js.
-
- Developed and maintained basic features of web applications using HTML5, CSS3, and JavaScript, ensuring functionality and user experience.
 - Conducted thorough testing of web applications to identify and fix bugs, contributing to overall software quality.
 - Created and updated documentation for various web application components, aiding in knowledge transfer and project continuity.
 - Assisted in setting up and maintaining development environments, ensuring smooth workflow for the team.
 - Shadowed senior developers to gain hands-on experience with advanced development practices and methodologies.
 - Attended workshops and training sessions to enhance technical skills and stay updated on industry best practices.
 - Collaborated with the design team to ensure the implementation of consistent and visually appealing UI/UX elements.

Projects

Project #1: Table Extraion

Domain: Content Capture

Project Description:

Table extraction is the process of recognizing and separating a table from a large document, possibly also recognizing individual rows, columns or elements.

Roles and Responsibilities:

1. Spearheaded the design and continuous maintenance of a cutting-edge multimedia web application for the Cengage Group, leveraging state-of-the-art technologies.
2. Collaborated closely with cross-functional teams to define and transform project requirements into fully functional features. Utilized React.js and responsive design techniques to craft an interactive and user-centric interface that adapts seamlessly to various devices.
3. Proficiently managed state and data flow by implementing Redux or similar state management solutions, ensuring efficient data handling and application behavior.
4. Seamlessly incorporated multimedia elements, including video and audio playback, to elevate the overall user experience, making it more engaging and immersive.
5. Implemented robust user authentication and data security measures to safeguard sensitive multimedia content, ensuring data privacy and integrity.
6. Actively participated in the agile development process, including sprint planning, consistently achieving project milestones, and meeting deadlines effectively.

Project #2: Nmg-e-commerce

Domain: E-commerce

Project Description:

Nmg-e-commerce application is online application . user's booked from home to what they needed.

Roles and Responsibilities:

1. Involved in development of User Interface using HTML/HTML5, CSS/CSS3, JavaScript, JSON and Webpack
2. Collaborated with cross-functional teams to define and translate project requirements into functional features.
3. Utilized React.js and responsive design techniques to create an engaging and accessible user interface.
4. Managed state and data flow efficiently using Redux or similar state management solutions.
5. Integrated multimedia components such as video and audio playback, ensuring a seamless user experience.
6. Implemented secure user authentication and data protection measures to safeguard sensitive multimedia content.
7. Actively participated in the agile development process, including sprint planning, and consistently met project milestones and deadlines.

Projects

Project#3 Vision Express

Domain: E-Commerce

Role: Front-End Developer

Project Description:

Vision Expression is a specialized online platform focused on eye care, providing users a range of valuable services. These offerings encompass the convenience of scheduling eye checkup appointments and the opportunity to browse and purchase various eye-related products, including contact lenses and eyeglasses.

Roles and Responsibilities:

- 1.Developed Solution Card, Top-Up Card, and Total Price Card components using a technology stack comprising React, HTML, CSS, and Bootstrap. These enhancements significantly improved user interaction and enhanced the visual representation of crucial information.
- 2.Established a dynamic navigation menu utilizing React Router, ensuring smooth navigation and consistent user experiences across various devices.
- 3.Ensured efficient codebase management by adopting version control with Git (Bitbucket), facilitating collaboration and maintaining code integrity within the team.
- 4.Actively engaged in Agile methodology, actively participating in sprint planning sessions and adhering to iterative development cycles to guarantee the on-time delivery of project objectives.
- 5.Fostered cross-functional collaboration by closely collaborating with various teams, aligning efforts effectively with project goals, and achieving milestones collaboratively.
- 6.Took the lead in designing and implementing solution-centric UI components that emphasized user engagement and the clear conveyance of information.
- 7.Integrated a responsive navigation system, streamlining user access to different application sections and enhancing user-friendliness for a seamless experience.

Declaration:

I am confirming that all the information provided above is accurate to the best of my knowledge.
